

OUTMANI MAHFOUD

Senior DevOps Engineer | CI/CD & Infrastructure Automation Specialist

Morocco | Full Remote | +33 6 XXXXXXXX | mahfoud@email.com

PROFESSIONAL SUMMARY

Senior DevOps Engineer with 10+ years building and scaling production infrastructure. Expert in CI/CD automation, containerization, and infrastructure-as-code. Delivered 80%+ pipeline automation and 3-day→10-minute infrastructure provisioning. Proficient in Kubernetes, GitOps, Linux, and multi-cloud environments.

KEY ACHIEVEMENTS

End-to-End AI Infrastructure Pipeline (2025-2026): Designed and implemented complete GitOps-driven deployment pipeline for hybrid AI infrastructure at Saham Bank. Automated provisioning, scaling, and observability across NVIDIA Operator, ArgoCD, and Kubernetes clusters. Eliminated manual deployment steps, reducing release cycles from days to hours.

Infrastructure Provisioning Automation (2022-2023): Built Ansible playbook library reducing Windows/Linux VM deployment from 3 days to 10 minutes. Integrated security scanning, compliance checks, and application deployment. Achieved 95% consistency across 500+ VMs.

CI/CD Pipeline Optimization: Designed multi-stage pipelines with automated testing, security scanning, and blue-green deployments. Reduced deployment failures by 70%.

TECHNICAL EXPERTISE

CI/CD & Automation: Jenkins, GitLab CI, GitHub Actions, ArgoCD, Terraform, Ansible, Helm

Container & Orchestration: Docker, Kubernetes (AKS, EKS, self-managed), container registries, Helm charts, NVIDIA Operator

Cloud Platforms: Azure (AKS, App Service, Foundry), AWS, Nutanix

Infrastructure-as-Code: Terraform, CloudFormation, Bicep, declarative infrastructure patterns

Linux & Scripting: Advanced Linux, Bash, Python, shell scripting, package management

PROFESSIONAL EXPERIENCE

AI & Infrastructure Expert | Saham Bank, Morocco | 2025-Present

Architected GitOps-driven deployment pipeline for AI workloads; managed NVIDIA Operator scaling; built multi-stage CI/CD for Kubernetes

Senior DevOps Engineer | Financial Services | 2022-2024

Led Kubernetes migration; built Terraform infrastructure for multi-cloud deployments; designed CI/CD strategy for 50+ teams

DevOps Engineer | Enterprise IT | 2019-2022

Developed Ansible automation; implemented GitLab CI; built monitoring and alerting infrastructure

CERTIFICATIONS & EDUCATION

PhD in Computer Science | Red Hat Certified Specialist | Microsoft Azure Administrator | CKA (Kubernetes)
